

A detailed close-up photograph of a radio-controlled engine's internal mechanism. The engine is primarily black with some silver and blue components. Three servos are visible, each with yellow text labels overlaid on the image. A bundle of multi-colored wires (red, yellow, blue, green) is connected to the servos. A silver gear is visible on the right side, and a white plastic component is at the bottom right. The background is dark and out of focus.
