

X8R_LBT_build151118 is for X8R and X6R receivers;

X4R_LBT_build151118 is for X4R and X4RSB with CPPM function already integrated;

XJT_LBT_build151223 is for XJT module, internal modules for Taranis X9D Plus and X9E.

XJT_LBT_build151223 integrates both D16_LBT mode and LR12 mode. For LR12 mode, just flash the firmware for XJT module, internal modules for Taranis X9D Plus and X9E, while L9R receiver does not need to be flashed. Existing L9R receivers could work with it as well.

Note: LBT firmware is not compatible with previous EU firmware. FrSky highly suggest you to upgrade your radios, modules, receivers with old EU firmware to their corresponding LBT firmware.
